Beauchamp Financial Technology Announces HedgeConnect® to become Certified Disaster Recovery Partner

London July 6th, 2005 – Beauchamp Financial Technology (BFT) and HedgeConnect®, the disaster recovery division of Corporatec Limited, today announced that BFT had chosen HedgeConnect® as a Certified Disaster Recovery Partner, to provide BFT clients with an outsourced disaster recovery solution directly connected to their BFT portfolio management systems.

HedgeConnect® will provide Beauchamp customers with a choice of two disaster recovery packages, providing either overnight or real-time backups of business-critical data and application directories onto dedicated servers hosted by HedgeConnect® at remote locations. Unlike traditional disaster recovery solutions, users of HedgeConnect® will have secure access to their DR servers from any location, at any time, using an RSA SecurID key fob. As a result, they will have immediate access to key applications and data, including their Beauchamp portfolio management systems, in a disaster recovery situation.

Clare Flynn, President of Beauchamp Financial Technology said, “We are very pleased to be able to offer our clients a trusted third party disaster recovery solution, provided by hedge fund IT specialists like ourselves with specific attention to storing and recovering data from Beauchamp systems. There is considerable demand amongst hedge funds for an affordable but robust disaster recovery service that can offer both managers and their investors the peace of mind that comes from knowing that business-critical data is being backed up and maintained by experts.”

Anthony Hamilton, Founder and Managing Director of Corporatec said, “Our partnership with Beauchamp Financial Technology underlines our commitment to providing clients with a unique, cutting-edge disaster recovery technology that not only enhances their network security but also measurably mitigates business risk due to inaccurate or lost trade data. The hedge fund industry has reached a level of maturity where business continuity planning has become vital. HedgeConnect®, Corporatec’s wholly owned disaster recovery division, offers fund managers an efficient, practical, vendor-approved and cost-effective disaster recovery solution.”

About BFT

Founded in 1997, Beauchamp Financial Technology (BFT) builds, markets and supports trading and portfolio management software products for alternative investment managers. Its flagship product, FundManager, has gained over 190 clients in three years, and helps manage more than \$55 billion in assets under management. The software suite spans all stages of the trade life cycle from order management through custody and settlement. BFT operates from offices in London, New York, Riga and Hong Kong. Further information on BFT can be found at www.bftl.com.
